Zero Waste for Zero Hunger

When you recycle materials through **GOALZERO Recycling** — a social enterprise of Care and Share Food Bank for Southern Colorado — you take an important step towards meeting your Triple Bottom Line.

We give your business a purpose beyond profit. Your employees are brought together for a common goal — *Zero Waste for Zero Hunger* — as your recyclable materials form a revenue stream to advance the mission of Care and Share Food Bank.

**GOALZERO Recycling** helps you reduce the amount of waste your business sends to landfills and incinerators — reducing energy usage, pollution and CO2 emissions; as you conserve natural resources such as timber, water and minerals.

A recycling expert will carefully assesses your needs, shares zero-waste best practices and provides long-term, no-cost training and consulting to help you understand and implement strategies to recycle more and waste less. This may help you reduce waste removal costs, while you avoid purchase costs through waste prevention.

**GOALZERO Recycling** believes our dedication to you and your business will nurture your dedication to Care and Share. Our quality customer service reflects the fact that we regard our business partners as valued stakeholders in our mission.
